PINION GEAR		
T O O L	Tooth form	Profile shifted
	Module	6
	Pressure angle	20°
Number of teeth		13T
Coefficient profile shifted		+0.517
P . C . D		Ø78

NOTE

- Reduction ratio : 1 : 44
- Input Torque : 13 Kgf.m
- Output Torque : 286 Kgf.m
- Noise 85dB Below
- Be sure to lubricate the oil before assembling the reducer to the equipment.
(Recommended oil specification: ISO VG220)
- The input and output torque values listed are theoretical and may differ from actual capabilities and depend on the operating pressure and size of the motor.
- Products made of CASE and castings may differ from actual dimensions due to tolerance of strain and draft angle of castings.
